

As of February 2017 OSG UK welcomes

Brunswick Tooling

to its group of companies

- Reamers & pre-ream cutters
- Special indexable insert tooling
- Special solid carbide, carbide tipped & HSS tooling
- Regrinding, refurbishment & repair tooling
- Special products

BRUNSWICK

In the early 80's the "Brunswick" carbide tipped precision reamer was developed. The company moved into the production of special indexable insert tooling.

Brunswick Reamers

- The best in reamer manufacturing to deliver the precision needed
-

Indexable insert tooling

- Tailored solutions increase profit through improved productivity
-

Solid & brazed carbide tooling

- Delivering durable, high precision and performance solutions

OSG UK can now offer the Brunswick Tooling range, including:

- Adjustable reamers and non adjustable reamers (AFP)
- Sizes range from 6mm-250mm diameter
- Reamers are available in tungsten carbide and cermet tipped. The range of reamers are also available with various high performance coatings
- All reamers come with through-coolant facility as standard
- Designed for blind or through holes
- 32 - 250mm diameter available on Kaiser Couplings
